

SCALP ANTI-TACHES 07

HIGH PERFORMANCE WATER REPELLENT, OIL REPELLENT
- NON-FILM FORMING IN WATER PHASE WITH ACRYLIC
FLUORINATED RESIN BASE

PRODUCT BENEFITS

- Highly effective
- Produces a beading effect
- Odourless
- Non-flammable
- Prevents the build up of grime on surfaces and limits the formation of micro-organisms
- Micro-porous
- Easy and rapid impregnation of material pores
- No special labelling required, not hazardous to health or the environment
- Without silicone
- Effective against graffiti

PACKAGING :

- 20 L : pallet of 24 X 20 L
- 5 L : carton of 4 X 5 L
- 1 L : carton of 10 X 1 L

AREAS OF APPLICATION

SCALP ANTI-TACHE 07 is designed for use on porous materials for protection against the penetration of oil, grease, fat, wine, coffee, tannin, etc., on mainly horizontal surfaces such as interlocking paving stones, unsealed floor tiles, reconstituted stones, marble, concrete, cement, natural stones.

APPLICATION

1. DILUTION: Ready to use, never dilute.

2. TOOLS: Roller, manual sprayer, airless spray gun.

3. METHOD: Mix SCALP ANTI-TACHE 07 well then apply to the surface to be treated (from the base upwards in the case of a vertical surface). Apply one or two coats at 10-minute intervals. Avoid overuse of the product, which could leave coloured traces on the surface. Apply SCALP ANTI-TACHE 07 on clean and preferably dry surfaces.

SCALP is a French family-owned business and manufacturer of cleaning, protection and treatment solutions, with over 65 years as a construction-industry specialist.

4. APPLICATION TIME: N/A SCALP ANTI-TACHE 07 permeates the surface thoroughly. The treatment will be effective immediately on complete drying of SCALP ANTI-TACHE 07 (several hours).

5. APPLICATION TEMPERATURE: From 5 to 50°C. Efficacy is reduced at extreme temperatures.

6. CLEANING OF TOOLS : Clean tools in water immediately after use.

7. APPLICATION RATE: According to materials and their porosity.*

8. STORAGE: Store the product in a frost-free location where it is protected from the weather and away from direct sunlight.

* Coverage areas are provided for information only and can be used to assess a project. They are in no way contractual; only tests can define the actual amount of product required depending on the surface to be treated.

PHYSICOCHEMICAL PROPERTIES
