

SCALP SOL'NET

PROFESSIONNAL DETERGENT INTENDED FOR REMOVING SAILS AND CEMENT LAITANCES

PRODUCT BENEFITS

- Fast action
- Efficient and powerful
- Highly versatile
- Concentrated
- Low odour

PACKAGING :

- 25 kg: pallet of 24 X 25 kg
- 6 kg: pack of 4 X 6 kg
- 1.2 kg: pack of 10 products

AREAS OF APPLICATION

Extremely effective product with double action. On the one hand, it is a professional concentrated acid cleaner to remove dirt and residues at the end of construction sites: sails and cement laitances, plaster residues, limestone deposits, rust, etc. on hard surfaces (tiles, ceramics, bricks, blocks, etc.). On the other side it allows to degrease and clear concrete floors before painting or renovation (service station areas, interlocking pavers, industrial floors). It destroys and solubilizes the soils of hydrocarbon origin and others.

APPLICATION

1. DILUTION: Depending on the amount of grime and the support's sensitivity, use the product pure or diluted to a volume of product for 5 volumes of water.

2. TOOLS: Brush or sponge

3. METHOD: Thoroughly moisten the surface beforehand. Apply the product on the support and leave to act for 5 to 10 minutes. It can accelerate the effectiveness of the product by a mechanical action. Rinse effectively with water under pressure or with water jet before the product is completely dry. Repeat the operation if necessary.

4. APPLICATION TIME: From 5 to 10 minutes.

5. APPLICATION TEMPERATURE: From 5 to 50°C. Efficacy is reduced at extreme temperatures

SCALP is a French family-owned business and manufacturer of cleaning, protection and treatment solutions, with over 65 years as a construction-industry specialist.

6. CLEANING OF TOOLS : Tools must be cleaned with water immediately after use.

7. APPLICATION RATE: around 150 g/ m². *

8. STORAGE : Store the product in a room protected from frost, adverse weather conditions and direct sunlight. Do not store in a temperature < 5 °C.

* Coverage areas are provided for information only and can be used to assess a project. They are in no way contractual; only tests can define the actual amount of product required depending on the surface to be treated.

PHYSICOCHEMICAL PROPERTIES

- | | |
|---|---|
| • Concentrated product | • pH : 1 |
| • Transparent liquid | • Not frost resistant, but effects reversible |
| • Density : 1.2 +/- 0.03 g /cm ³ at 20°C | • Flash point : None |

APPLICATION PRECAUTIONS

1. PROTECTION OF SURFACES: Protect surfaces that have not to be cleaned (paint, marble, comblanchien limestone, calcareous stone, glass, metal, surrounding vegetation). If any doubt, carry out a test on a small area. Do not apply SCALP SOL'NET on calcareous surfaces.

2. PROTECTION OF PERSONS: This product is a mix between mineral acids. It is corrosive to skin and can cause severe burns. In case of contact with the skin, wash immediately with water. Wear a suitable suit (waterproof). Wear goggles that protects from splashes. Wear PVC gloves.

Important: The contents of this documentation result from our experience of the product. We cannot be held responsible for its use in each individual case. It is essential to test areas to be treated beforehand. See the Safety Data Sheet (SDS).
